The alternative health insurance policy should be a maximum of \$500,000 in coverage for emergency care, hospitalization, evacuation and repatriation.

- How to Make Payments:

By offering favorable conversion rates unmatched by larger financial institutions, peerTransfer enables our international students to save a significant amount of money on their payments to us. And, because peerTransfer captures all the student information at the time of payment, our students will be alerted when their payment is received. In addition, as a school we benefit from this free service because peerTransfer provides an online dashboard that will help us properly reconcile incoming international wire payments. You can find the link to the peerTransfer solution on the University of Wisconsin – Parkside Cashier's Office. See:
